DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over German application DE 197 30 975 A, and further in view of Sullivan, both of record, for the reasons given in the previous action, hereby incorporated by reference. Applicants' remarks have been carefully considered, however are not deemed persuasive. Applicants argue that there is insufficient motivation for one in the semiconductor art to combine the above references to use freezing water to provide the mechanical stress needed to fracture the wafer. However, it is noted that independent claim 27 makes no mention of a semiconductor device, and is claiming the broad concept of freezing water to separate a layer from a substrate.

However, notwithstanding this omission, the examiner believes that since the German reference cited above, allows for any kind of mechanical stress to be applied to the porous layer, in order to produce a fracture, and given the universally recognized property of water to expand when frozen, and its equally well known propensity to fracture adjoining materials that fail to expand at the same rate, as taught by Sullivan, then there would exist ample motivation for one skilled in the semiconductor art, to utilize the teachings of these references and utilize freezing water as the source of mechanical stress described by the German reference.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH

shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
